Arriscraft
Building Stone · Brick · Limestone

Our brick goes to new lengths.

Contemporary Brick offers modern refinement in an array of colors.

This unique brick style is unlike traditional brick, owing to its random lengths and elongated appearance.

The calcium silicate composition of this brick means that Contemporary Brick benefits from the Arriscraft Natural Edge™ production method, which ensures remarkably natural and unique color ranges and striations unmatched by other manufactured stone products.

Code	Height	Length	Depth
CON312	79 mm / (3-1/8")	Random	90 mm / (3-1/2")

Photographs represent colour, range and texture as closely as the printing process allows.
