

ELEVATION THIN BRICK STYLE GUIDE

Arriscraft Elevation Thin Brick delivers a modern, streamlined look with the lasting quality of calcium silicate. With a wide range of colour options and the ability to create custom blends, you have the freedom to design a look that's truly unique.

Our new Norman-sized option gives you even more design flexibility, featuring an elongated profile that adds a fresh, contemporary style—perfect for both residential and commercial projects.

Limestone

At 2-1/4" high, Elevation is an elegant, linear thin brick that features a unique weathered look. It comes in random lengths up to 23-5/8" and two thicknesses: 3/4" and 1-3/8". These thicknesses can be installed independently or mixed to create depth variation and shadows. Also available, corner units create a full-bed look.

ELEVATION NORMAN

Love the modern look of Elevation but prefer a clean, subway-tile style? Our new Norman-sized Elevation brick is the perfect solution. Measuring 2-1/4" high and 11-5/8" long, this sleek option is ideal for smaller spaces and a great choice for DIY projects.
